Printable Wallpaper

Frosted Window Film

A selection of textures for printable wallpaper

Printable Wallpaper is now available in a variety of textures in widths up to 1.37m. This extends our line of wall papers in both roll width and decorative textures.

Cgate wallpaper is now a comprehensive market solution as it can be printed on with most machines using solvent, UV and Latex inks.

Printable Window Film

Our range includes both printable self-adhesive and cling film.

Cgate's new line of window films offers a range of solutions and ideas for decorative window graphics as well as a printable frosted self-adhesive vinyl.

CGATE REFLECTIVES

There has been a growing demand for printable prismatic reflective banner for advertising applications, road signs and other safety signs.

Cgate now supplies a high quality white reflective banner with an adhesive base, 1.22m wide with an adhesive release paper. The specifications of this prismatic material meet the requirements for reflection at the observation angles required for road signs.

The white reflective banner can be printed on using solvent based inks for outdoor applications. There is also a freeze-resistant material for signs that are installed in cold conditions. The banner is waterproof and will withstand all outdoor conditions for 2 years.

Cgate reflectives can be supplied in both commercial and engineering grades and are durable for 3 and up to 7 years outdoors, respectively. Selected items are printable and are available with high intensity, prismatic finishes and a variety of colours.

SELF ADHESIVE VINYL

Self-adhesive vinyl is one of the most popular materials for the sign industry as it is excellent for printing and can be applied to both flat and curved surfaces. For a number of years, Cgate has been supplying economic monomeric SAV for applications such as hoarding boards, trade show partitions and advertising panels.

Cgate recently launched a new line of 80 micron polymeric self-adhesive vinyl with up to 3 years outdoor durability. The material is produced using high-end film and adds to our successful monomeric line.

TEXTILES

In addition to our range of small format polyester and cotton canvas banners, we now offer a selection of textiles, up to 5m wide for lightboxes and other displays. These include backlit and blockout banners that are printable with Dye-Sublimation, Latex, UV and Solvent inks.

CGATE QUALITY CONTROL

Long distance shipping requires that special attention be given to packing and loading. Cgate's Shanghai staff supervise both the production of each order and the packing and loading of each container. The packing has been designed by Cgate to meet customer demands and is supervised by our logistics team. The first two pictures below show Cgate banner packing. The bottom picture shows a customer warehouse with Cgate stock after delivery.
