- Tech corner:**
- Tips for ACP installation**
- UL certification for Cbond**

CGATE PRODUCT REVIEWS

Cgate printable Wallpaper (above) The holy grail for interior designers is being able to offer personalized solutions without the high cost of labour and materials. High quality digital printing has opened the door to providing one-off and on-demand designs. Cgate's printable Wallpaper, which is applied exactly like traditional wallpaper, can be used to create original interior spaces. Wallpaper is supplied either in standard 0.53m widths or double size rolls. Applications range from store and office design to domestic interior decorating.

Magnetic pop-up (right) Cgate's display portfolio now includes magnetic wall pop-up displays. This is a cost effective item packs away into a convenient travel case which also serves as a table for small exhibition stands.

Several sizes and models are available.

Self-Adhesive Vinyl: In response to popular demand for an economic self-adhesive vinyl, Cgate has added two new monomeric SAV products; SAV1413 which is 0.1mm thick with a 140gr backing paper and SAV1211 which is 0.08mm thick with a 120gr backing paper. Both products can have clear, black or grey permanent or removable glue and are suitable for printing with both solvent and eco-solvent inks.

New Magnetic Products: Advertisers are always looking for more ways of economically updating their displays and printable magnetic materials offer an easy and cost-saving solution. Cgate has expanded the magnetic sheeting product range to include two new products:

- A very thin, 0.30mm printable magnetic sheet that can be applied to metal surfaces.
- Printable PET steel "paper" which can be used for quick poster replacement on a magnetized board. Thickness is 0.18mm

Both products are suitable for solvent, eco-solvent and UV ink printing.

TECH CORNER

Cgate's newsletters now include useful technical tips

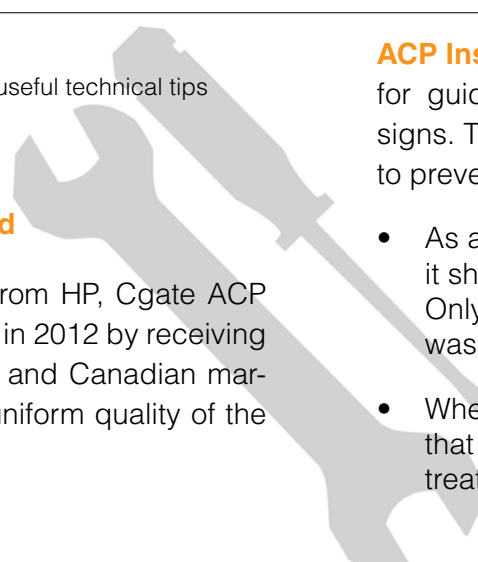

UL Certification for Cbond

After the 3 star approval from HP, Cgate ACP has been further endorsed in 2012 by receiving UL certification for the US and Canadian markets, thus confirming the uniform quality of the product.

ACP Installation tips: Customers often ask us for guidelines for fixing aluminum composite signs. The following recommendations will help to prevent erosion or delamination.

- As aluminum is an alloy, it is essential that it should not come in contact with metal. Only aluminum fixing screws, rivets and washers should be used.
- When installed outside, we recommend that the edges of the cut panels should be treated with a suitable primer.

Stockline Plastics

Scotland's Trading Partners for the Cgate Group

Stockline are now selling more Cbond throughout Scotland than ever before. Stockline's Sheena O'Brien says, "We find that Cbond's high quality coating, strength, colour range and ease of fabrication, make it an ideal product for almost any signage application."
