Light Tarp - The future of outdoor advertising

Wallpaper - for all LF printers

Cbond Digital - HP highest rating approval

Cgate's colourful stand at Fespa Barcelona in February this year, was an excellent place to meet with customers visiting the show.

The Barcelona show was earlier in the year than previous Fespa shows. It was, however, a good show both for new contacts and the many existing customers who had a chance to sit with Cgate and discuss future business opportunities.

Cgate looks forward to a very busy Fespa in London 2013.

CBOND

Cbond Digital: recommended by HP

Cbond Digital has been approved with 3 stars by HP. This is the highest level on the HP scale and is listed both on the HP recommended media website and on the media list for the HP Scitex FB7600 Industrial press.

Cbond digital has a special coating with low density which allows better adhesion of the ink to the surface.

A special easy-peel protective foil with low static effect minimises surface charge when the foil is removed.

The strong aluminum skin assures high rigidity so that the sheets remains flat during printing.

Cbond Digital can be supplied in thicknesses of 2, 3 and 4mm with a skin thickness of 0.21mm. Sizes are up to 1.5m wide and 4.05m long.

Direct print applications include:

Design, Displays, POP/POS, Traffic and Information displays.

More information can be found on the HP's website using the link below:

http://h10088.www1.hp.com/cda/gap/display/main/index.jsp?zn=gap&cp=20000-13698-12989-27064-27065^312768_4041_100__

Wallpaper for LF printers

The increased popularity of cost-effective customised applications has prompted Cgate to offer a wallpaper product that can be used on all types of large format digital printers including UV, Solvent and Latex.

Roll widths of 0.52m and 1.06m are available.

Applications include covering walls and surfaces in offices, shops and homes as the wallpaper is easy to apply on walls and is much the same as standard commercial wall papers, transforming the look of a room or wall space with unique images.

Light Tarp

In addition to heavy printable tarpaulin, Cgate now offers a light tarpaulin in a variety of colours.

The 700gr strong construction of 1000x1300D/20x18 with high peel and tear strengths and with roll widths of up to 3.2m, is suitable for truck covers, tents, pergulas, corporate advertising and more.

Special colours can also be matched with a minimum production order of 2000m.
